

FOR FLEET SAFETY AND TRAINING LEADERS

Annual safety training is forgotten before the next quarter.

THE PROBLEM

A single DOT violation runs \$1K-\$16K. A preventable accident runs \$500K-\$10M+. Annual safety training is forgotten within weeks — leaving drivers and warehouse staff operating on the last thing they actually remember. LMS completion is not retention, and an OSHA auditor knows the difference.

HOW QUIZLAR CLOSES THE GAP

Quizlar turns SOPs, hours-of-service rules, hazmat procedures, and equipment cert content into voice quizzes. Drivers drill hands-free at rest stops. Warehouse staff drill during break. FSRS schedules cards before forgetting curves drop, so retention is measured weekly — not once a year at recertification.

WHAT PILOT CUSTOMERS SEE IN 8 WEEKS

Weekly, not annual

SOP + safety reg retention measured continuously

Defensible

Auditable proof of ongoing competency for DOT + OSHA

60+ languages

Multilingual workforce coverage without translation

PILOT OFFER

Five pilot engagements with fleet and logistics safety teams. Pilot includes deck build from your existing safety material, employee onboarding, retention dashboard, and a final outcomes review.

Pricing: Pilot pricing: up to three decks built from your SOPs, HOS material, or equipment cert content in 5 business days; up to 50 drivers or warehouse associates onboarded; per-employee retention dashboard; 8-week pilot with weekly check-ins. No commitment beyond pilot.

Book a 20-min pilot scoping call:
